GOOD DEEDS W. I.

The Good Deeds W. I. met at the home of Mrs. W. Ervine on Thursday April 10th. Meeting opened by singing O Canada, saluting the flag and repeating the creed. Reports from the different committees on Good Deeds' day, were given. All report serving lunch to the children, ice cream, candy and oranges and nuts also. Programs were put on by the different schools which were very much enjoyed by all present. Twin Coulee put on a contest, and prizes given. The report of the conference at Lethbridge was read by Mrs. A. J. Kennedy; the official delegate, Mrs. R. Irwin being unable to be present. This report was enjoyed by all. At the close of the meeting, Mrs. W. Ervine entertained the ladies by playing court whist, Mrs. J. Hutton winning first prize and Mrs. M. Middleton consolation. A delightful lunch was served by the hostess.

CHURCH OF CHRIST NOTES

Easter Sunday completed the illustrated lessons and chart for the eleven weeks before Easter. The quota was more than accomplished and results were most gratifying to all. Songs, readings, recitations and a quartet were the special features of the morning program and were enjoyed by the large number gathered together on this great day.

Mr. Homer Montgomery of Nanton gave the evening message which was a wonderful inspiration to those that heard him. The program which preceded the message was as follows solo, "The Resurrection," by Mrs. Almond; duet, "The Cross is Not Greater Than His Grace," by Mr. and Mrs. Theo. Mutz; reading "Our Church," by Mr. Joe DeWitt; anthem by the choir. Much praise and appreciation is due all those that helped in any way to make these programs a success and also to the committee for the beautiful flowers contributed in the beautifying of the church.

Regular services at the usual hours Sunday, April 27th. Subject for the morning, "Pentecost, Why Pentecost?" Our Aims, 11:30 bible school. This study is beneficial to all.

Christian Endeavor 7:15. The young people are invited to attend this interesting meeting conducted by the young folks.

Evening song service at 8 o'clock. Topic "Then Cometh Jesus." An invitation is extended to all to come out and attend these services.

LOCAL ITEMS

Mr. E. M. Clark of Arcadia, California, is visiting with his many friends in town. Miss Reta McIntyre is spending the Easter vacation with her parents Mr. and Mrs. Pete McIntyre of Reid Hill.

The Minneapolis-Moline Power Implement Company will demonstrate their Wheatland Disc Plow on Friday afternoon April 25th at the farm of E. M. Hollister one mile west of Kirkcaldy. — Dickinson & Hoskyn, Agents.

Included in the 22 wells at which operations in the lime are proceeding is the Sterling Pacific well which might be classed as a producing well.

LOCAL ITEMS

Miss Mary Cook who teaches Richmond Hill school is this week at her home in Gleichen.

Eva and Gordon Rutton of Raymond are spending their Easter holidays in Vulcan at the home of Mr. and Mrs. Recor.

Miss Olive Burns spent the week end visiting her sister, Vera, at the home of Mr. and Mrs. Mitchell. She made a short visit with friends in town before returning to Calgary.

Miss Bertha McNabb spent the Easter holidays at her home in Macleod.

Miss Lorna Ferguson is in Vulcan this week visiting homes of her numerous friends.

JUDGMENT AGAINST MUNICIPAL HOSPITAL

Judgment against the Municipal District of Vulcan for a total of \$10,233 was entered by Mr. Justice Walsh in the supreme court on Tuesday morning in the action brought against the district in behalf of two-year-old Eunice Stone and her father Glen Stone of Vulcan. The plaintiffs had sought to recover damages from the defendant, the action arising from injuries sustained by the infant plaintiff while a patient in the Vulcan Municipal hospital.

The civil jury which heard the case awarded \$9,500 to the infant and \$1,003 to her father. This latter sum was reduced by the court to \$733.

Liability having been admitted by the municipal district the only issue before the court was the amount of damages.

The plaintiff's claim was based on injuries sustained by the infant plaintiff when she was burned by boiling water. No evidence was presented with regard to the manner in which the injuries were received, as the defendant municipal district had admitted liability.

Special damages of \$750 were sought by the father, thus sum covering doctors' bills and loss of time incurred due to the child being detained at the hospital for several months. The infant's claim was for the pain and suffering and for personal disfigurement by the scars on the face and head and deformity of one ear, coupled with mental and nervous effects that may probably result therefrom.

For the plaintiff's evidence was given Tuesday morning by Doctors W. Merritt, D. S. MacNab and E. G. Mason, while Doctors E. B. Ronch and J. W. Richardson testified in behalf of the defendant. Their testimony had to do largely with the nature and extent of the child's injuries were likely to have in later life.

The jury deliberated for three quarters of an hour before bringing in their award as above noted.

Messrs. Ballache, Burnet, Spangle and Heseltine of High River are solicitors for the plaintiff. A. L. Smith, K.C., and A. A. Balache, K.C., acted as counsel for the plaintiffs at the trial. The defendant was represented by A. Macleod Sinclair, K.C. and H. J. Maber of Vulcan, who is the defendant's solicitor.

Roy Walker shows trees and shrubs. Ad Miss Alma Shaw is spending the Easter holidays with friends in Calgary.

This is clean up week in Vulcan. Citizens should take time to assist in making this town attractive for the summer.

K. K. McLean, of McLean & Anderson, Sight Specialists, 224 8th Avenue West, Calgary, visits the King Drug Store Saturday, May 3rd. Make appointments Drug Store.

GOLF CLUB PLANS FOR COMING SEASON

Reference was made in these columns last week to the annual meeting of Vulcan golf club. After the reading of the minutes of the last meeting and the presentation of accounts, both of which were adopted, the following officers were appointed: Greene, president; Dr. Barker, vice-president; Del McQueen, secretary and treasurer; Clyde Clarke, captain and H. J. Maber, vice-captain. The executive is composed of the two presidents and two captains.

Colin McInnes was named as chairman of the entertainment committee, with power to appoint others. The two captains will form the handicap committee.

Dues were fixed at \$2.00, \$4.00 and \$10.00 for school pupils and young people under sixteen years of age, ladies, and men, respectively.

Store to let, will make alterations to suit tenant, in Rochon Building, Main Street, Vulcan. — Ad

Mr. and Mrs. Wm. Peterson and Miss Bessie Rennals motored this week to Turner Valley where they visited a couple of days with friends.

Special Easter Services Vulcan United Church

The special services held during Easter week were very well attended and the many who came each night were well repaid by faithful attendance of the choir and the fine addresses given. These services culminated with a very successful Easter Sunday service. The church was well filled in the morning when the baptism of infants took place. In the evening the choir, under the leadership of Mrs. A. E. White, rendered the sacred cantata "The Resurrection Song," to a crowded church. The solo "Hear Ye the Story" was rendered in fine voice by Mrs. A. E. White. Mayor Butchart took the solo in "The Wondrous Cross" and "Sing the Resurrection Song," which were well rendered in a fine tenor voice. Mr. E. Roebuck sang the bass solo in "As it began to Dawn," very acceptably. Miss Helen Simington and Miss Le-

REBEKAHS HONORED MONDAY EVENING

The Vulcan Rebekahs were highly honored by a visit from the president of the Rebekah Assembly, Sis Saunders of Calgary and vice president, Sis. MacGregor of Lethbridge, also Sis. Morden, first past president of Alberta and Bros. Saunders, Morden, Doane, McPherson and Crawford, all of the Rebekah Assembly, and Sis. Tesky, district deputy president of District No. 15, Carmangay. There were also visitors from Lomond, Carmangay and Nanton.

The degree was conferred by Dominion Lodge No. 41, Lethbridge, winners of the Naomi Challenge Cup competition at the Grand Lodge Session in 1928 and 29. The degree was exemplified in a very creditable manner. A delightful supper was served in the dining room of the Oddfellows hall at 7 p.m. to the visitors.

Sis. Saunders gave a very inspiring address under the good of the order, also congratulated the officers of Clover Leaf lodge on the splendid manner in which the work was conducted. Other short addresses by Assembly officers present were equally enjoyed.

At the conclusion of the business, a midnight lunch was served to about eighty visitors and members. In a few well chosen words, Sis. Schenck, N.G. presented the Assembly president, Sis. Saunders with a small token of appreciation.

ERROR

Owing to an error on the part of the secretary, an open meeting of the Protestant Women's Federation was announced in our last issue for Tuesday the 22nd inst. This should have read the 29th. This meeting will be held next Tuesday and will be addressed by Mr. Wycherly on the subject of "The Efficiency of Christ's Religion." All women of Vulcan and district are invited.

FRANK HARBACK TO BE ORDAINED

Mr. F. R. Harback of this town has graduated from St. Stephen's college Edmonton. He also gained the gold medal for skill in the whole course of theology, which medal was presented by the lieutenant-governor. Mr. Harback was also the winner of a traveling scholarship of \$500 for graduate study at another college, and a prize of \$10 in books, both from the St. Stephen's College Women's Guild. In addition there was a gift of books from Hillhurst United church, Calgary, of which Frank was formerly a member. In 1927 he won the gold medal for debating; has served as president of St. Stephen's Theological club, and for the past year has been president of the St. Stephen's Literary society. Additional to his studies at St. Stephen's, he is taking up B.D. work at the University and has served as pastor of Ardron United church for the past year. He will be ordained at Conference in May, and then continue studying in Chicago University.

KIRKCALDY NEWS

Mr. Lorne Maisey who has been attending Tech. in Calgary, returned home on Thursday for the Easter holidays.

The Kirkcaldy Women's Institute, will meet at the home of Mrs. R. S. Clemment on Thursday, April 24.

Mr. Joe Todd of Barons was a visitor at the home of his brother, Mr. Bill Todd on Sunday.

Mr. and Mrs. Patterson and family of Barons were visitors at the home of her parents, Mr. and Mrs. John Fox on Sunday.

The Kirkcaldy Young People's club will meet at the home of Messrs. Eldon and Harry Peters on Wednesday, May 14th at 8:30 o'clock.

Vulcan High School Report for Easter Term

The following tables show the standing obtained by the students of the Vulcan High School during the period ending April 17th. An average year's work for Grade IX is 5 units; for Grade X and Grade XI not more than 8 units should be attempted. Some students have been trying to carry too heavy a course, and have in some cases made poor marks. Students handling fewer than 6 units are not attempting what is normally considered a full year's work.

Every student has been given a detailed report, showing standing in individual units. Parents and guardians are requested to examine these carefully. If any explanations are desired, the staff will be pleased to give them. Will those concerned see that reports are acknowledged promptly?

Grade IX		Units	Average
Alice Herman	7	72.3	
Floyd Pritchard	7	71.3	
Violet Tinkess	7	70.4	
Pearl Morley	7	67.9	
Doris Hill	7	67.6	
Roberta Todd	7	66.6	
Enid Ellwood	7	64.6	
Albert Collier	7	60.4	
Mary Brown	7	59.9	
John Merkle	7	56.3	
Bernard Brocklebank	6	56.3

LOCAL ITEMS

Cash sale of furniture at Rochon's building, Main street, Vulcan, every afternoon, until all sold. — advt.

Mr. Harry Webster was at his home in Calgary for the Easter holidays.

Miss Ethel Dingley and Mr. Gordon McIntyre were Vulcan visitors over the week end at the home of Mr. and Mrs. Dave McIntyre.

The new officers of Vulcan Catholic Women's League are: Mrs. E. J. Fortier, president; Mrs. A. Mitchell, first vice-president; Mrs. J. Shaw, second vice-president; Mrs. C. Smith, secretary; Mrs. Herman Spanke, treasurer.

FAMOUS HUMORIST TO VISIT VULCAN

JESS PUGH

Jess Pugh, internationally celebrated humorist and entertainer whose wit and comedy have captivated thousands and hundreds of thousands whose programmes are in such demand that one must apply months in advance to secure his services; who is hailed by "The Billboard," "the outstanding publication of the platform and theatrical world—as the most original comedian now-a-days the public"—Jess Pugh the nonpareil, is to appear in Vulcan this summer.

Pugh's genius is for making people laugh, making them laugh in that overpowering abandoned way that admits no room for worries, cares and tribulations. He makes you smile chuckle and then as his fun gains strength and impetus, he sweeps you along in an irresistible tide of mirth that leaves you helpless with delight. He says that the official appraisal of the laughing muscles is \$20,000 and that we should never let such a valuable asset remain useless. After hearing Jess Pugh, one is inclined to feel that \$20,000 is too low.

His repertoire is enormous and widely diversified. Dramatic readings, dialect tales, impersonations, character songs, hilarious monologues and a running fire of brilliant, spontaneous wit are woven into a well planned, balanced programme. He wastes no time; he skips gaily from story to story with a zest and a joy that is irresistible.

There is no one quite as great as Jess Pugh in his field. Chick Sales is an impersonator extraordinary, Will Rogers inimitable in his shrewd and waggish comments on the ways of the world, but Jess Pugh is something of the best of both of these, with certain lovable, endearing qualities that are peculiarly and unmissably his own. There are no synonyms to describe him, no comparisons to explain the charm of his work. He and his programmes are simply—Jess Pugh.

PRINTING SALESMEN SOMETIMES DECEIVE

The Vulcan Advocate prints everything but money and linoleum, so you don't have to listen to the fairy tales told by the travelling printing solicitors. They always tell how little the local printer can do, and how much greater their facilities are for the same kind of work. It may be news for you to know, that the Advocate has at its disposal an up-to-date linotype machine and other machines as late as many found in cities—and that is not all; these machines are backed up by thirty-five years of experience, mostly spent in the cities of England and Canada. Our prices are the same on many items, and cheaper on some, but never higher. If you doubt this statement just phone 36 and find out.

Blairmore school board has voted \$200 for the examination of the teeth of the school children.

James Crocket the dean of newspaper owners in New Brunswick, died on April 17 at Fredericton.

CROP REPORTS and BUSINESS SUMMARIES

DURING the season the Bank of Montreal issues periodical reports on crop conditions throughout Canada.

Every month it publishes a "Business Summary" covering business conditions in the Dominion and in the countries where the Bank has offices.

Both of these publications are sent free to all who request to have their names placed on our mailing list.

BANK OF MONTREAL

Established 1817

Total Assets in excess of \$400,000,000.

The Vulcan Advocate

An Independent Weekly Newspaper issued every Thursday afternoon, at the office of publication, Vulcan, Alberta. Subscription price per year, in Canada \$2.00, United States and other countries \$2.50. Advertising rates furnished on request.

CHARLES CLARK, Proprietor
TOM WHITTINGHAM
Editor and Manager

WHEAT CARRY OVER

In arriving at an estimate of the world wheat situation, the following figures are given: Importers estimated requirements, 620 million bushels; exporter's estimated surplus, a total of 824 million bushels. The difference between world requirements and surplus supplies of exporting countries, does not indicate world carry-over. These figures as shown are for the full crop year and not from April 1 to the end of the season.

The three distributing factors which have reversed the seasonal trend to a greater extent than ever before known are—the record all time 1928 world wheat crop; newly enacted high tariff walls in Europe; low consumption of all American wheat as a result of too high price levels last fall.

Two dollar wheat does not appear to be an immediate fact.

U. S. TARIFF BILL

The U.S. tariff bill with its alterations inimical to Canadian trade has passed the Senate. The following senate increases in duties on farm products, compared with present duties, were approved: Cattle, weighing less than 700 pounds, 2½ cents a pound, now 1½; weighing over 700 pounds, 3 cents a pound; now 2. Milk, 6½ cents a gallon, now 3½; cream, 56 6-10 cents a gallon, now 30. Skimmed milk and buttermilk, 2½ cents a gallon, now 1; unsweetened condensed milk, 1 8-10 cents a pound, now 1; sweetened condensed milk, 2½ cents a pound, now 1½; all other condensed milk, 2 53-100 cents a pound, now 1 3-8.

GRASS MUST GROW

At this time of the year, children, careless adults and delivery boys often indulge in a practice which should be checked. This is the habit of taking short cuts across lawns and boulevards. Damage is often done to grass at this time of year, which leaves traces all summer long. All because one thoughtless citizen started a patch across a well kept lawn. It is poor encouragement for those wishing to keep attractive properties. Keep off the grass for another month at least and help to preserve town beauty.

RELATIVE CRIME

Newspapers in Ontario are incensed over the fact that very light sentences are being dealt out to unnatural parents who beat their children unmercifully. On the other hand two "convicts"—17 and 19 years of age—who broke jail in Toronto are sentenced for two years for theft. The brute who maltreats children gets a month. This should be a good talking point for some of the women's organizations.

NEW TARIFFS

The United States is finding herself the centre of attention on tariff matters, and it is giving her some surprise and concern to find that she is not going to be alone on tariff raising.

There are threatened French increases on American products notably automobiles and trucks.

Australia is retaliating with the same measures as U.S. herself.

All eyes are on Canada to see how she will react against all the proposed increases, which strike at her trade so seriously.

While it was surely not to be expected by American legislators that they could continue to raise their tariff walls against all other countries, without some retaliation, yet they are quite seriously concerned over Canada, Australia, France and other countries.

If the Beaverbrook policy of Free Trade within the Empire, developed into fact, it would still more seriously concern United States. General feeling is that little sympathy in due her.

ADVERTISE THE TOWN

No business man in any place should allow a newspaper published in his town to go without his name and business being mentioned somewhere. It does not mean that you should have a whole, half or even a quarter page ad., but your name should be mentioned if you do not use more than a two line space. A stranger picking up a newspaper should be able to tell what business is represented in the town by looking at a paper. This is the best possible town advertiser. The man who does not advertise his business does an injustice to himself and the town. The life of a place depends on the live, wide awake and liberal advertising man.—American Bankers' Magazine.

The income of the Consolidated Mining and Smelting Company for the year 1929 amounted to \$13,030,065, and the profits per share, \$17.31. The net profits of the company for the year are placed at \$7,879,000.

THE HAWKER AND PEDDLER

With the recent decision to inaugurate a business tax in Hanna, citizens will have all the more reason to show loyalty toward the business man in their midst; the man who contributes directly and indirectly, day in and day out, to the growth and prosperity of our "home town."

The hawker and peddler who exhibits his wares from door to door may tempt the thoughtless householder, but the man and woman who realizes that no town would be worth living in if it were not for progressive business men, will give these birds of passage little encouragement.

"Be loyal to your own community" is a slogan of which every citizen should take heed.

The hawker and peddler has received encouragement at the hands of the Alberta government, but the citizen who is loyal to his own town and community will discourage the door-to-door peddler of pants, printing and prunes.—Hanna Herald.

APPLE SALESMANSHIP

It is not particularly gratifying to Canadians to be told so often, on good authority, that more oranges are eaten in Canada than apples. When an explanation is asked for this state of affairs, it is said that it is largely due to the persistent campaign that has been carried on by the orange growers of California. The astounding testament is made in the annual report of E. G. Dezell, the general manager of the California Fruit Growers' Exchange, that by spending \$1,680,000 in the advertising and merchandising of Sunkist products last season the exchange obtained \$118,875,102 for a crop of oranges, lemons and grapefruit so large that it would have brought disaster to the growers a few years ago. The demand was created by advertising, and then good salesmanship did the rest.

WHAT IS PETROLEUM?

Petroleum is the organic material derived from living matter. It is the fossilized product of animal or vegetable material that lived ages ago. Heat, pressure, bacterial action playing on great beds of slowly decaying animal or vegetable matter, caused oily materials, which would flow along or through certain strata and form underground pools of oil, or oil sands. From an economic point of view, the underground pools are most valuable. They are generally under pressure of pocket gases which force the oil upward when a well is drilled into the pool.

What more economical for human use than a pool of oil providing its own pressure to lift it to the surface ready for use as a raw material.

Petroleum can meet with no genuine competition from other possible liquid fuels such as vegetable and animal oils or synthetic fuels. None can be produced in quantity which can begin to compete in price with petroleum products.

Nature has already liquified petroleum and has performed all preliminary treatment during long ages at no cost.

No one can dream of any competition for petroleum, until the exhaustion of our petroleum supplies decades hence, makes it necessary to provide new liquid fuels at any cost.

CATERPILLAR

It Always Wins

In every battle with the weather your CATERPILLAR Tractor will always win. Late seeding can be completed quicker—seed beds can be more thoroughly prepared. Inbuilt power and stamina that stands the gruelling abuse of heavy spring work; economical operation that keeps costs down. There's a size for your farm—that will do better work and do it cheaper.

ALDERSYDE

A young Mexican chemist claims to have discovered a means to convert lead into silver. The process is said to consist in mixing a powder, the secret which he has refused to divulge.

A few days ago, a Blaimore pet cat entered the house with a live trout, about six inches in length. When advised that the season was closed, the cat immediately returned the fish to the stream—Blaimore En prise.

BUSINESS BETTER

Conditions in Business World Better Than is Generally Believed

Business conditions are better than people think they are, says Mr. J. J. Gibbons, head of the Gibbons' Advertising Company, Toronto, who has just made a Dominion-wide tour.

Conditions of depression are mental rather than actual. If we had had similar conditions in Canada in 1925, we would have considered ourselves very well off. There is actually more money in the country this year than last year. And men who were keeping their eyes glued on the ticker tape are now using their energy in running their business.

Mr. Gibbons expressed hearty accord with the Wheat Pool's policy, saying: "If we cannot sell wheat for a fair price it is time to stop selling it and get into something that will bring right return."

Mr. Gibbons says in the wheat situation and the threatened raises in U.S. tariff, the prospect of Canada coming to depend more on inter-provincial trade and inter-Empire trade if the provinces can trade with each other instead of importing, Canada would be on a much more independent footing.

Here and There

(503) Canadian Pacific Railway Friday night broadcasts are now being sent out across the Dominion from coast to coast. Letters are being received from all parts of Canada in appreciation of the programmes and of the radio receptions in all centres. Arrangements have been made with the National Broadcasting Company of the United States to place special C. P. R. programmes on the air, early in April, over WJZ to thickly populated sections of the Eastern United States.

Veteran of 65 years railway service and one of Canada's earliest telegraph operators, William Phillip Martin, formerly assistant superintendent of the Canadian Pacific Railway, died in Vancouver recently. He learned telegraphy from his father when a boy and became a chief despatcher at the age of 18.

Discovery of a new species of whitefish in Clear Lake, Manitoba, is announced by A. Bakov of Manitoba University. The new species has been named Coregonus Odonoghuei, in honor of Dr. C. H. O'Donoghue, formerly of the faculty of Manitoba University. The newly-discovered fish is common in Clear Lake. It lives at a great depth during the summer, coming to the surface only in the spawning season.

Sixty head of pedigree cattle and sheep from the Royal estates in England is the object of Professor W. L. Carlyle's trip to the Old Country aboard S.S. Minnedosa recently. They are destined for the Prince of Wales ranch at High River, Alberta, and are a further proof of His Royal Highness' interest in improving Canadian live stock.

Available horsepower in Canada is 20,187,000 horse power under conditions of ordinary minimum flow and 23,112,000 horse power under conditions of ordinary six months flow. Only about 6,000,000 horse power has been harnessed.

Here and There

(468) Smashing all known records for the 120 miles of heavy going that characterized the International Dog Shed Derby run at Quebec recently, Emilio St. Godard galloped in to his fourth victory in that event when he led Leonhard Sennala to the tape by a margin of five minutes flat in eleven hours, one minute and 27 seconds for the whole distance. St. Godard won \$1,000 cash and a gold cup. There were twelve contestants in the race.

The western branch lines construction programme of the Canadian Pacific Railway for 1930, announced at headquarters of the company recently, will involve an expenditure of \$11,000,000, said D. C. Coleman, western vice-president, interviewed at Winnipeg. In addition to this sum, ten million dollars will be spent on improvements designed to increase the capacity and efficiency of lines operated in the west.

Purchase of the Algonia Eastern Railway by the Canadian Pacific Railway is announced by E. W. Beatty, chairman and president of the latter company. The property runs between Little Current and Sudbury and its purchase is subject to approval of the board of directors of the Canadian Pacific and to ratification by shareholders at the annual meeting to be held May 7 next.

For several years Canada has led the world in aerial surveying and last year consolidated that leadership by applying, for the first time in any country, aerial methods to redietic reconnaissance and transportation. Around 70,000 square miles were covered by aerial photographs last year by the Royal Canadian Air Force and the Canadian Government Department of the Interior.

Canadian investments abroad at the end of 1928 totalled \$1,579,074,000, according to a recent official estimate. Of this amount \$874,626,000 is invested in the United States; \$131,915,000 in Great Britain; and \$572,533,000 in other countries.

"As far as the army is concerned, the horse will be a museum piece within the next 20 years," said Brig.-General W. B. M. King, recent arrival on S.S. Duchess of York, after a trip during which he inspected regiments of the British Army. General King added that the mechanization of the army was taking rapid strides and, though a costly operation, would pay for itself by decreased maintenance charges within a period of five years.

New Brunswick has an estimated population of 419,000, according to the twelfth annual report of the chief medical officer of the provincial department of health tabled in the Legislature recently. An interesting detail of the report was the statement that during the past year more than 25,000 persons had been permanently immunized against diphtheria.

Surest sign of spring in Eastern Canada is the running of the sap in the maple trees. This annual harvest is now on and last year the total value of maple sugar and maple syrup produced in Canada was \$6,118,656. This money accrues mostly to farmers and the province of Quebec is the leader of the industry in Canada.

Ten years ago capital investment in electric power in Canada was about \$100,000,000. To-day it is over a billion dollars and total power available from present installations is nearly 6,000,000 h.p. This is about one-fifth of possible development.

EMPIRE FREE TRADE

Lord Beaverbrook a Strong Advocate of Purchase of Wheat Grown Within the Empire

So many of our readers are interested in the British line of thought and argument in regard to Canadian wheat prices, that a speech made by Lord Beaverbrook to an army of sympathetic agriculturists at Norwich, England, may have interest.

We extract fragments from a report of the speech published in a British daily. Lord Beaverbrook is advocating his Free Trade within the Empire. He says:

"You have heard the complaint that British people would not consent to increase in the price of their food, and if there is no increase, how is the farmer to be helped? You have seen the price of wheat fall and fall under the dumping of East Prussia wheat, of French wheat, under immense shipments of Argentine wheat produced at low labor costs. Have you seen a corresponding fall in the price of the 4 lb. loaf? If we get wheat up a little bit is there any reason to suppose there should be an increase in the 4 lb. loaf? Not at all. Our prices for wheat are being driven down and down, but bread remains at a steady level.

Under Empire Free Trade, industry all over the Empire must thrive if we are to be a prosperous people. Industry is not only manufacture, it is also agriculture and of all industries, agriculture is the biggest. Without the farming industry the manufacturer cannot thrive. Prosperity can only be realized if all the community prospers. You will never cure the unemployment situation till you make the farming industry prosperous. It is the salvation of the Empire.

There is plenty of room in the market for Empire wheat, Empire agricultural produce, but not room for both Empire agricultural produce and foreign agricultural produce.

What I fear is that if we do not get Empire Free Trade, we will have a decline in production—a continuing decline of production here at home and in the Empire too, until we find ourselves relying absolutely and entirely on the production of the rest of the world."

Upon being asked by the farmers present as to the guarantee of a price for British wheat, Lord Beaverbrook said he was not in favor of guaranteeing the price of wheat; he was in favor of making the price safe and sure by keeping out the foreigner. "Canadian could supply all the wheat we require at the present moment."

A good slogan: "Patronize Alberta Industry and be Prosperous."

Fully convinced that skirts are coming longer, a local guy, less than eighty years of age, has sent his spectacles to Calgary to have parapets attached.

Two financial concerns, one located in Ontario and the other in Oklahoma, are said to be seeking concessions for large-scale development of the Athabasca tar sands. Alberta has a tremendous asset in the north with which not one Albertan in 100 is intimately acquainted. Some day, however, it will produce wealth in this province which will rival our present wheat crop.

Smashing Proof ... of greatest value

All motordom saw the amazing results of Challenger week. The New Essex Challenger set outstanding marks in every locality.

It climbed hills seldom attempted by any car. It set new marks for acceleration. It established economy results never before associated with such performance.

These feats were established—not by just a few handpicked specially tuned cars—but 5,000 Essex Challengers in all parts of the country, many of them owner-driven. Results speak for what every New Essex Challenger can do.

We continue our invitation, Ride—Ride—Ride! Know yourself what this brilliant New Essex Challenger can do. Then no lesser car can satisfy.

E. KING, VULCAN

AGAIN HOADLEY

Hon. George Hoadley's name has been associated with many ridings, notably High River, Okotoks, Lethbridge, Calgary and now Lacombe. It is rumored that Hon. Mrs. Parlyby may resign and that Hon. George Hoadley would be offered the nomination. No minister or private member has been the subject of more "rumors" than Mr. Hoadley, and so far the minister has not committed himself. Nor has his chief, Premier Brownlee.

THAT GREAT MORAL GESTURE

The Helena (Mont.) Independent naively comments on Canada's proposed stand to prohibit liquor clearances to "the land of the free." Just when Canadians were feeling sort of uplifted at the idea of making Americans good at a cost of some \$40,000,000 a year to us, along comes a big U.S. paper looking askance at our motives. 'Twas ever thus! However, this is the way the Helena Independent put it:

"Think of the Canadians trying to help us become a dry nation! Stop and think again why our Sister of the Snows is so much concerned in our personal habits! Premier MacKenzie King and R. B. Bennett, the leading figures in the Canadian parliament's fight to outlaw shipments of liquor into the United States, are crafty gentlemen—doubtless with Scotch ancestors. If they can prevent the shipment of liquor into the United States, people from this country will have to go up into Canada and get it. If it is sold to bootleggers, it brings only the wholesale price per case. The profit all goes to manufacturers and government liquor stores, but if the people of the States will visit Canada in order to consume it, the Dominion gets all kinds of profit out of the business. The manufacturer and importer—if it is imported—get theirs, the government liquor store gets its share; if it is wine or beer served in the taverns, the tavern keeper gets his. And then the hotels get a slice of American money; the filling stations along Canadian roadsides get their, and if there is any money left the stores will sell our tourists some linens, a Hudson Bay blanket, a pair of driving gloves or a bottle of perfume, for 20 to 50 per cent. less than the merchandise may be purchased on this side of the line. American tourists flock to Canada simply by the million now. If the Canadian government stops sending liquor into the United States, the number of tourists visiting the Dominion will double next summer. They are clever men, these Canadian brothers! They will not only finish paying their war debt, but they will construct a wonderful system of highways at our expense."

CONQUERED BY A SONG

Lands have been annexed by fire and sword, but the west coast of Vancouver Island has the unique distinction of being won by a song. The Spanish admiral who led an expedition against it in 1790, so charmed the heart of the warlike Maquinna, Lord of the Nootkas, with a theme song which he caused his merry men to sing over and over until the chief was placated, that the Indian made him welcome and gave him jurisdiction over the Sound and the Islands. Since that date the coast of Vancouver Island has become the rendezvous of tourists from all over the world. Within easy reach of Vancouver,

Victoria and Seattle, it yet offers the attraction of territory quite unspoiled by industrialism and a paradise of beautiful scenery and fruitful sport. As it was when the Spaniards first sighted it, so it virtually is today. Canadian Pacific steamships of the British Columbia Coast Service travel up and down this coast, and make it easily and comfortably accessible to visitors. Lay-out shows Canadiana Pacific coastal vessel "Princess Norah" sailing among the islands off the Vancouver Island coast; lower left, Indian parade in village and totem pole with Lord and Lady Willingdon and Captain Jack, Indian Nootka Chief.

ITEMS OF INTEREST

"As a political creed communism is practically discredited in China today," said Colonel G. W. Birks, in charge of Y. M. C. A. work in the Far East, interviewed as he passed through Winnipeg recently en route to Montreal after a six-months stay in the Orient. Colonel Birks thought that China would shortly split into independent parts, North and South China.

Seeding has become general in some Saskatchewan points and in many farming centres of Alberta, and is expected to be general shortly if favorable weather conditions continue, according to reports coming in to the Winnipeg offices of the agricultural department of the Canadian Pacific Railway.

Seventy head of finest thoroughbred stock arrived at Saint John recently to go forward by Canadian Pacific Railway to the Prince of Wales ranch at High River, Alberta. It is the first shipment of the kind to the ranch in the past four years. The majority are pedigree shorthorn cattle.

"There is at present in Great Britain a decided awakening of interest in the Canadian universities," said Dr. Cyril Norwood, headmaster of Harrow, one of the most famous of English public schools and Alma Mater of Lord Byron. Dr. Norwood is chairman of the delegation of British headmasters here on a tour of inspection of ten Canadian universities. He arrived at Saint John recently aboard S.S. Duchess of Bedford.

Canada's first ranking tennis star, Dr. Jack Wright, figures lion shooting, elephant baiting and antelope hunting is just the kind of sport to keep a tennis player in trim. Arriving at Vancouver recently aboard S.S. Empress of Canada, Dr. Wright says he feels in great shape for the forthcoming Davis Cup matches.

Retirement of C. E. McPherson, assistant passenger traffic manager Western Lines, Canadian Pacific Railway, after more than 50 years of railway service, and promotion of six other officials of the department from coast to coast of Canada, has been announced, effective May 1. Promotions are: H. W. Brodie to be overseas passenger manager; R. G. McNeillie to be assistant passenger traffic manager, eastern lines, Montreal; H. R. Mathewson, general passenger agent, Winnipeg; and George R. Carter, assistant general passenger agent, Montreal.

The annual production of honey in Canada is about thirty million pounds. While a great deal of honey is used in the home, the principal commercial users are confectioners, bakers and bottlers.

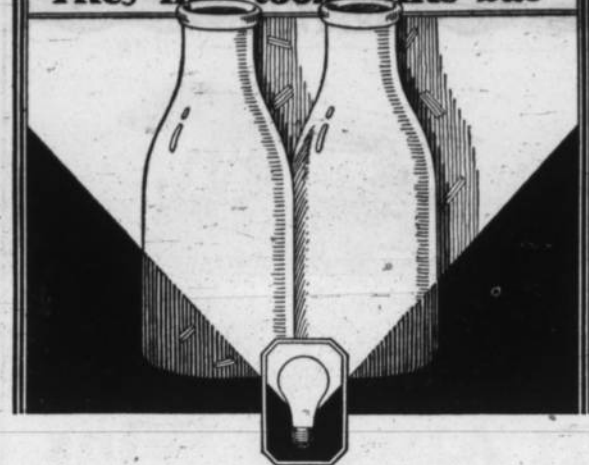

At the World's Poultry Congress to be held at the Crystal Palace near London in July, a feature of the Canadian exhibit will be a model of the Prince of Wales' ranch at High River, Alberta. It will occupy 100 square feet of space and will be fitted with electric appliances and lighting that will show the ranch in a novel and active way.

A MUCH CLOSER LINK

Another one of the great human family to show that she is not feeling particularly warmly toward "Uncle Sam" is the Argentine. That South American country is showing a much stronger leaning toward Bri-

tain of late. A great exhibition of British industries is being shown at Buenos Ayres and there is a reciprocal trade agreement that may mean a closer link between Britain and the Argentine. The latter country, like tariff rates on beef, hides, leather, casein and other products.

They may look alike—but.

The appearance of the two bottles may be the same but the milk may differ greatly in quality. Lamps look alike, too, but Edison Mazda Lamps give you the longest possible service.

NEW BUDGET

British Face New Taxation Laid Up-
on Country Property and Wealth

Hon Philip Snowden, British chan-
cellor of exchequer, dropped his
bomb, when he announced his budget
on Monday. An expenditure of al-
most four billion is asked by the gov-
ernment. It is called a poor man's
budget as the heaviest taxation is
"on shoulders most able to bear
them."

New assessment is placed on coun-
try property, on death duties on es-
tates exceeding 2,000,000 pounds
from 40 to 50 per cent; and on the
duty on beer.

Mr. Snowden regretted that the
financial position would not permit
the repeal of the McKenna duties in
this budget, nor could he carry out
this year the pledge to remove all ex-
isting food duties, but the labor par-
liament certainly intended to do so.

SOUTHERN AIR MAIL

Crows Nest Route Being Strongly
Pressed by Southern Cities

In the face of the obvious superior-
ity of the southern air mail route over
that of the one to the north, the
fact remains that a strong opposition
to this more feasible route does exist.
Clagary and points north are
naturally opposed to the southern
direct route. A test air mail service
will be tried out this coming June,
July and August, according to a re-
cent decision of the postmaster gen-
eral, and it will be noticed that the
Crow's Nest or southern route is the
one selected for this test. However,
the permanent route will not be se-
lected until later, when regular land-
ing fields will be determined and bea-
cons for night flying erected.

Major Tudhope, director of civil
aviation, flew from Grand Forks to
High River, Alberta on May 28 of
last year in less than three hours;
and the trip from Grand Forks to
Vancouver has been made quite often
in around two hours. Thus five
hours may be roundly figured as the
flying time from the coast to Alberta
via the southern route—not eight
hours as the Herald suggests.

It seems to be definitely decided at
Ottawa and so ordered by the post-
office department that Lethbridge be
on the air mail route. But no bea-
cons have yet been contracted for nor
will they be until decision of the
route westward is absolutely made
and settled.

Every point along the southern
line should get busy and stay busy
until this matter is definitely settled.
—Cranbrook Courier.

AT THE OIL FIELD

In the history of Turner Valley
Oil Field which extends over 17
years, only 14 wells have been aban-
doned, and of these only six because
of geological conditions. Amongst
the abandoned structures are the
Highland, Stockmen, Nanton Cooper,
Footfalls 4 and British Dominion 1.

At present there are 55 wells drill-
ing of which 22 are in the limestone
this being the greatest number in
producing history at any one time.
Locations have been chosen definitely
for 46 new wells in the field.

There are a total of 108 wells in
the Valley. Of these 39 are produc-
ing crude oil and naphtha at a rate
of 100,000 barrels monthly.

The shallowest well to reach the
lime in Turner Valley was Royalite 4
which struck lime at 3450 feet and
got production at 3740 feet. The
deepest well ever drilled was British
Dominion which drilled to 6600 feet
without striking limestone.

Amongst wells at present drilling,
the shallowest in the lime is Sioux
City which struck lime at 4,400 feet
and is now 4416 feet. Royalite No.
16 is not only the deepest well in the
limestone, but gives promise very
shortly of becoming the deepest ac-
tive well in the field. At last report
the well was being drilled from a to-
tal depth of 6,224 feet of which 1,513
feet are in the limestone.

NEW E P STOCK

Best Shipment Ever Brought to
Canada in Years

Seventy head of the finest pure
bred stock are in Canada on their
way to the E.P., having been pur-
chased in England. This is the first
shipment to the ranch in four years
and Prof. Carlyle has taken great
care in the selection.

"The forty pedigree Shorthorn
cattle, all of which have passed the
extreme tuberculin tests, are quite
the best shipment that has ever been
brought to Canada in my experience,"
Professor Carlyle said. "They rep-
resent purchases made from some of
the most famous Scottish and Eng-
lish breeders, as well as a selection
of nine 2-year-olds and three year-
ling heifers from the home farm at
Stoke, Clontyland, Cornwall, which
are of the Prince's own breeding.
These heifers are of certain notable
Shorthorn families not at present rep-
resented on the ranch."

Included in the contingent are 30
Hampshire Down sheep, three of
which were prize winners at every
agricultural competition in which
they have appeared.

Here and There

(508)
England is intensely interested
in reciprocal trade possibilities
with the Dominion. Although a
satisfactory trade between Eng-
land and Canada has been carried
on in the past, an even greater in-
crease is being shown by well-es-
tablished firms in Great Britain in
Empire trade," said R. R. Gal-
braith, British exporter, at Saint
John recently on landing from S.S.
Duchess of Richmond. Mr. Gal-
braith is touring Canada in the in-
terests of his firm.

"There is no feeling of resent-
ment against the Canadian Wheat
Pool in Great Britain," stated Rt.
Hon. Lord Eustace Percy, seventh
son of the seventh Duke of North-
umberland, on landing from S.S.
Duchess of Athol at Saint John
recently. "The consensus of opin-
ion in the British Isles is becom-
ing increasingly conscious of a se-
rious economic problem which
both British and Canadian farm-
ers are called upon to face," he
added.

Covering nearly 90 miles, lead-
ing into rich agricultural territory
in Saskatchewan and Alberta, the
Canadian Pacific Railway has just
let contracts for grade construc-
tion of four branch lines. It is an-
nounced that C. C. Coleman, vice-
president in charge of western
lines. These contracts cover less
than half the railway's present
grading programme.

Receipt of the first entry in the
world's grain exhibition and con-
ference to be held in Regina in
1932 has been credited to William
Hudson of Kathryn, Alberta, with
an exhibit in the Reward wheat
class. Mr. Hudson, who has been
exhibiting successfully in provin-
cial fairs in the past three years,
came to Canada from the Old
Country in 1912.

Announcement is made by the
Canadian Pacific Railway Company
that on and after Wednesday,
April 9, they will accept shipments
of freight at eastern points des-
tined to points in the north-west,
via Port McNicoll, Ont., and their lake
and rail route, subject to delay at
Port McNicoll pending the first
sailing. There will be five steamers
in the company's lake service be-
tween Port McNicoll and the head
of the Lakes during the coming
season.

While the Five Power Con-
ference is in session in London con-
sidering ways and means of pro-
moting world peace, active prepa-
rations are under way in Canada
for launching another war with
relentless fury. Millions of casual-
ties will result from this war
which is timed to start in May. It
is the war on insect pests in the
Dominion which work incalculable
damage to trees, plants and crops
unless checked by Government entomologists.

Homestead entries in the four
western provinces during January
and February this year numbered
1373 as compared with 1416 for the
corresponding period of 1923. Al-
berta and British Columbia secured
advances while Manitoba and Sas-
katchewan showed recessions.

Over \$82,000,000 has been invest-
ed in manufacturing enterprises
in the Province of Alberta and
these concerns are paying about
\$14,000,000 a year in salaries and
wages to over 11,000 employees.
Similar rapid development in in-
dustrialism is to be noted in the
other provinces of Manitoba and
Saskatchewan.

CROP REPORT

Heavy Rains Follow Dry Conditions.
Some Seeding Finished. Conditions
Now Generally Good

The prevailing dry conditions of
the soil which has made spring work
somewhat difficult and the drifting
quite general has been relieved by a
general hard rain which started on
Sunday evening last and continued
steadily for twenty-four hours. This
was followed by a wet snow, with
the result that moisture in plenty
for immediate good has been had, and
conditions look splendid for further
work on the land with promising re-
sults. Seeding was generally being
undertaken when the rain started
and about 25 per cent. of it had been
accomplished. Seven hundred acres
was reported finished by one farmer
while many had not as yet started
but were ready to do so. The result
of the needed moisture is hailed with
delight by all as a predicted dry
spring was forecasted by many. It
will be about a week before the land
will be fit to again undertake seed-
ing when the seed will go in under
very favorable circumstances. Prices
are holding rather steady and low
and are quoted locally today as fol-
lows: wheat 85, oats 38½, barley 34,
and rye 44.

OIL NEWS

Of those in the limestone, 4000
feet is the shallowest at which this
formation has been struck, while the
greatest depth before reaching lime
has been 5500 ft.

Included in the 22 wells at which
operations in the lime are proceeding
is the Sterling Pacific well which
might be classed as a producing well.

Drilling operations are proceeding
at 33 wells above the limestone for-
mation. A number of these are due
to strike the limestone very shortly.

SCHOOL BOY QUIPS

People go about Venice in gorgon-
zolas.

A polygon is a man who has many
wives.

Ambiguity means having two
wives living at the same time.

All brutes are imperfect animals;
man alone is a perfect brute.

CALGARY POWER

Increased Earnings of Company Re-
flect \$9,600,000 Expenditure Past
Two Years

As had been anticipated, the annu-
al report of the Calgary Power Com-
pany, Limited, for the year ending
December 31, 1929, showed a large
increase in the earnings of this pro-
gressive western utility. Gross earn-
ings from operations increased \$557,-
407, and net earnings from opera-
tions were \$339,769 higher than for
1928, reflecting expenditures of more
than \$9,600,000 on extensions during
the past two years.

In his remarks to shareholders,
President G. A. Gaherty stated in
part as follows: "The large increase
in earnings over those of the prede-
cessing year, amounting to \$557,406.93 in
gross earnings, and \$339,769.09 in
net earnings, is due to heavy expendi-
tures made on capital account dur-
ing the past two years, which
amounted to \$9,601,491.18, of which
there was expended during 1929, the
sum of \$6,178,938.58.

"The first unit of 18,000 horse-
power at the Ghost River develop-
ment was placed in operation late in
October, and the second unit, com-
pleting the equal installation of 36,-
000 horse power, was put in service
at the end of the year, thus enabling
the company to close down its auxil-
iary steam plants, which are now be-
ing maintained for stand-by pur-
poses.

"Late in the year an interchange
contract was entered into by the
City of Edmonton for power, involv-
ing the construction of a 132,000 volt
transmission line from the Ghost
plant to Edmonton. This line, 180
miles in length, is now nearing com-
pletion, and is expected to be in op-
eration early in May. In addition to
providing an outlet for power to Ed-
monton, this line will make hydro-
electric power available for the nor-
thern part of the company's system,
now being supplied by isolated steam
plants or by power purchased.

"The policy of extension of the
company's system into the rural sec-
tions of Alberta, instituted in 1926,
was continued during the past year.
The company now has in operation
or nearing completion a total of 1,695
miles of transmission line, of which
180 miles is 132,000 volt line; 400
miles is 66,000 volt line; and the bal-
ance is 13,000 volt line. Upon com-
pletion of the Edmonton line, the
company will be serving, either
wholly or in part, five out of the six
cities in the province, and 130 other
communities."

Two Girls Live on**Hot Water and Rice**

Due to stomach trouble, Miss A.H. and sister lived on hot water and rice. Now they eat anything and feel fine, they say, since taking Adlerika.

Even the FIRST spoonful of Adlerika relieves gas on the stomach and removes astonishing amounts of old waste matter from the system. Makes you enjoy your meals and sleep better. No matter what you have tried for your stomach and bowels, Adlerika will surprise you.—Errett King, Druggist, Vulcan.

PRAIRIE FARMING

Spring Operations Well Advanced Through Prairie Provinces

Generally speaking through the prairie provinces, a spirit of optimism governs the farming world. There is a reported increase of 31 per cent over last year in prepared acreage. There was a large amount of fall plowing done last year, owing to the short crop and early cutting.

Because of the heavier snowfall in the winter of 1930 over the winter of 1929, there is generally, a better moisture situation than in the spring of 1929.

In Manitoba, seeding has been well under way for a couple of weeks with a great amount of summerfallow land. The seed supply is satisfactory and there is little sign of curtailment of acreage. More coarse grains will be sown for feed because of weeds.

In Saskatchewan, seeding started April 13, much earlier than usual, but has been held up by rains. In the southern part, more rain is still required to bring up reserve moisture. There is a slight tendency to cut wheat acreage and sow more coarse grain and sweet clover. The feed has been short in some districts, with the live stock not in such good condition as in spring of 1929.

In Alberta spring also opened early. Seeding is more than ten per cent completed with no seed shortage looked for. An acreage increase of 25 per cent is looked for in the Peace River country. Rain in the Peace, and other parts of Alberta has roused all hopes. Livestock generally has come through well.

INTERNATIONALLY

Canada Pitchforked Into Foreign Affairs Urged to Think Internationally

Speaking in the House of Commons on International relations, Dr. Skelton, Under Secretary of External Affairs, says:

"Our position in international affairs is a unique one. We are in the first place a member of the British Commonwealth of Nations, the most significant experiment in political organization the world has witnessed in modern times. We are situated in North America, next door to the country which has been developing more rapidly than any other among the Great Powers, and halfway between the last century and the Asia which will share the dominance of the next. In every direction our interests in foreign countries have expanded. It is almost incredible. I doubt if it has come into our consciousness yet, so rapidly has internal trade developed, that we today find ourselves the fifth country in all the world in the extent of our international trade, only Great Britain, the United States, France and Germany surpass us."

Britain annually consumes over three billion worth of food products, three-fifths of which are imported. Since the war Britain's imports for Empire countries has greatly increased.

MAN CAN'T SLEEP, GETS NERVOUS, HATES PEOPLE

"I could not sleep and got so nervous I hated everybody. Since taking Vinol, I can sleep 10 hours and feel full of pep all day."—Julius Bender.
For 30 years doctors have prescribed Vinol because it contains important mineral elements of iron, calcium and cod liver peptone. The very FIRST bottle brings sound sleep and a BIG appetite. Nervous, wornout people are surprised how QUICK Vinol gives new life and pep! Tastes delicious.—Errett King, Druggist, Vulcan.

GET ACQUAINTED

Lack of Real Accurate Information on Canada, on Part of British

An Englishman not long in Canada, and already an ardent lover of the country, tells of the smattering of misinformation which he, with others, had been taught in excellent English schools regarding Canada.

Referring to the recent arrival in Canada of a deputation of British schoolmasters, here for the purpose of learning something of the country he hopes that they will learn a few actual facts: (1) that Canada with only ten million people is the fifth greatest trading nation of the world; (2) that Canada produces more pulp and paper than any other nation; (3) that we have the greatest travel systems that the world has ever seen; (4) that our fishing, mining, manufacturing industries are huge beyond belief; (5) that we have in Canada, one automobile for every eight persons, while Britain has one for every 23.

Will these British school masters be taken to see Turner Valley, one of the world's sights? How many have ever heard of it.

This Englishman also urges however that these same investigators will be shown the reverse side of the picture. Let them know of our seasonal employment, of the bad effect of poor crops on general industry, of the hardships to be endured before success may come, of the failure of the immigration policies, of the corrupt practices to be found in some civic administrations, of the domination of American ideals and customs. He concludes:

"No country is a Utopia. It is only by knowledge of each other's conditions that we can remedy ourselves. No one who comes here can fail to feel that confidence that people have in their country, confidence in the future and pride in the past.

"We all make mistakes, but show me the political unit that has made fewer mistakes than Canada."

INTERESTING NEWS

Mayland No. 1 well, after a shot of dynamite has an encouraging flow of gas.

Sterling Pacific south and west of High River is producing over 100 barrels of oil daily.

Banner Oils is down to 650 feet. This well is on the Highwood structure and is said to be a promising oil property.

The air mail service commencing May 2 gives prairie business men a cut of one day in mail going to and from Britain.

P. M. Christophers, labor member for Rocky Mountain, will not seek re-election, but will probably go on the mine examining board.

Wellington well is down to 4850 feet and 192 feet in the sand. It has a gas flow of three million cubic feet. It is close to Home oil wells.

Funeral processions will at all times have right of way on Ontario highways, is a recent ruling. This will be hard on the 50 mile an hour traffic.

Macleod oil well has blown back in to production the past week. Last January this well came in with a burst of gas that was measured at over 20 million cubic feet.

Twelve years ago there was one commercial bee keeper in Southern Alberta. In 1920, Southern Alberta produced five tons of honey, in 1929 200 tons. There are 5000 bee colonies in Southern Alberta.

"Lose your temper and you shorten your life," warns a psychologist. But not necessarily. One should always lose his temper with children, or with men much smaller than himself.

The value of production for 1929 of the Okalta oil well was \$233,248, 21 less royalties of \$1602.56 as compared with \$73,496.73 in 1928. Okalta has one well producing around 200 barrels per day, two wells drilling and two more standing awaiting equipment.

The U. S. Federal Farm Board in urging farmers to cut production says: "If the farmer can get more money for four bushels of wheat, than now he now gets for five, there is the incentive in raising the extra bushel."

Alberta has 6,000 new receiving sets this year, making a total of 20,551 radio fans, all listening in, night. Ontario is the province where the radio thrives most extensively with 201,673 homes equipped, Quebec has 89,992, Manitoba 25,000; Saskatchewan 31,992; British Columbia 34,349.

At the annual meeting of Imperial Oil Co. at Toronto, Turner Valley was given credit for having increased by more than 500,000 barrels, the output of Alberta fields during the past year. The Company stated they intended a thorough exploration of the field, but strange to say they are dismissing many men at the Valley and it looks like a quiet season.

Canada is not likely to play host to the Prince of Wales this year, is the opinion of Prof. W. L. Carlyle, manager of the E.P. ranch who is on his way back from the Old Country. Prof. Carlyle went to England to purchase some prize stock to augment the E.P. herd. The cattle and sheep are now in quarantine at St. John, N.B.

TRIUMPH OF CATTLE

Many of the Men Who Brought the Cattle Business to Alberta, Still Directing It

Bert Huffman writing in the Market Examiner, gives his impressions of the livestock show held in Calgary not so much with regard to the animals shown, as an appreciation of the quality of men who have for thirty years or more, persisted in the cattle industry and have made it, the triumph that it is today. It is an appreciation well and worthily expressed.

"With all the magnificence of the western wheat crop and the agricultural wealth which has come within the past 25 years, the cattle industry has also developed and spread and become an equal partner and helpmeet in the rich returns to this province.

"As I watched the seemingly endless parade of magnificent bulls before the auction stand, and heard the breeders vying with each other to secure the very best types for their future herds, my mind ran back over the years in retrospect. There, around this auction stand, still keenly bidding and buying, were some of the white-haired pioneers who actually started the cattle industry in Alberta.

"Undaunted by the years, still virile and keen as young men, optimistic and hopeful and courageous, these pioneers, the remaining members of that once great fraternity of the open ranges, mingled among their fellows with the ardor of youth and keenly competed for the honors of the day.

"But the miracle and wonder of the show to me was the sight of these white-haired veterans of the range, ripe in years, rich beyond words in experience, matured and vigorous and enterprising still, after the tedious lapse of the years. Those same men brought the cattle business of Alberta and the west into existence, nursed it, developed, supported it, saw it flourish and fade with the changing conditions until today through their enterprise and foresight and sheer courage, there are perhaps more cattle and finer cattle in Alberta than ever before, in spite of the narrowed ranges and agricultural expansion.

How many years these veterans have come to this bull sale for a week's relaxation and keen delight in bidding for new animals, let the records of the livestock association say.

"But as I looked at them about the auction stand I pictured to myself those same men as sturdy young fellows on the range, eating out of the pots and frying pans about a campfire, standing night guard in the rain singing to keep the restless herds quiet, pulling on wet ropes and riding unbroken horses day after day over the prairies of Alberta. And I said to myself that there will never be another such breed of men anywhere on the earth.

PERMIT REQUIRED

Conviction for Moving Stock Over 20-Mile Limit Without a Permit

A conviction was registered in the Calgary district a few days ago for moving cattle by truck over the 20 mile limit without a permit, and police have been notified to again call attention to this provision of the law, and to be on the watch for violations.

The term "stock" in this act includes all cattle, horses asses and mules. When ever the owner of any stock proposes to drive such stock from point to another distant twenty miles or more, and whenever he proposes to drive such stock to a point beyond the province or to or from a forest reserve, he shall send to the livestock commissioner or the nearest provincial policeman, so as to reach him prior to the removal of such stock, a notice setting out the description of, and the brands (if any) upon the animals or in case of any animal without a brand, the age, sex and color thereof, and shall when the stock are not to be driven by the owner himself, hand a copy of such notice to the driver in charge of the stock.

Stock thieves are beginning to use motor trucks in their operations, and this has led to special vigilance in enforcing the act.

ENSIGN NEWS

Henry Dixon, who has been in Calgary all winter, is home again to put in the crop.

New Imperial tanks have been installed at Ensign and are being operated by W. Mullins.

Monty Southgate has opened a service station and garage in Ensign under the name of Ensign Motors.

Mr. H. D. Parker is home again after being a patient of the High River Municipal hospital for three weeks.

Doris Ruark is back to school again after an operation for appendicitis in the Vulcan Municipal hospital.

Messrs. Blaine Parker and Arthur Southgate have accepted positions as mechanics in the Imperial Motors at Calgary.

Mr. and Mrs. Beech and Mr. and Mrs. E. Laxton of Claresholm were Easter Sunday visitors at the home of Mrs. Louise Jackson.

Mr. Hogan, a student of the Normal school at Calgary, was at the Ensign school last week for observation and practice work.

Jim Ireland who is working for Jim Williams had the misfortune of being knocked out for several minutes on Saturday by a back-firing tractor.

A very good service was held at Ensign on Sunday. The Rev. Farquar gave a very impressive sermon. A special choir sang a number of very good hymns.

Mr. and Mrs. R. Williams, Miss Marjorie Willis, Constable Nuthrown and Mr. Trapp of Calgary, were guests at the home of the William's family on Friday.

Church service will be held at Ensign on Sunday, Rev. Farquar minister. The Vulcan choir will give special songs. Sunday school will be held at 2:15 p.m. instead of 2:30.

Miss Jessie Walsh who underwent an operation for appendicitis was home for a few days but as complications set in she is again a patient of the Vulcan hospital. She is expected to come home sometime next week.

THE KIND WORD

It is remarkable the number of American publications which in speaking of Canada, are referring to our "bargaining ability," keen business acumen, "canny Scotch ancestry." Are these remarks intended to take our minds off the sting of the tariff increases, or are they used as a form of flattery, while something deep is afoot, or are they, after all, sincere? Can it be that we are smarter than we ever supposed we were? We must be careful.

The Saturday Evening Post is the latest to extend the appreciative word. In an editorial on "Our Northern Neighbors," it says: "The people of United States are coming to have a more and more wholesome respect for Canada as it emerges from pioneering conditions into a great industrial nation. It is not merely her wealth of natural resources which we admire, but the way in which her capable, industrious and enterprising people are developing them."

It is true that in ten years United States has invested some \$3,500,000,000 in Canada. But Canada has penetrated the United States as well. One of her life insurance companies is the largest stockholder in at least two of our great corporations and more than \$1,000,000,000 of the life insurance in our exports, ranking ahead of any of the great European powers, with a total value of nearly \$900,000,000, while we in turn, buy more than \$500,000,000 worth of goods from her.

Although Canada has only one-twelfth the population of the United States, she is indeed a powerful neighbor, and one whose bargaining ability is extremely great—far out of proportion to her population.

Then too, the Canadians seem to have very real genius in building up financial organizations; their banks and insurance companies attest to that.

Canada's population is sure to increase. Indeed, we are adding to it constantly. There is migration both ways, an interchanging population on a great scale that can only make for mutual respect and good will. In the case of Canada and the United States, there seems to be a mutual conquest or penetration of one by the other. In this instance, business victories carry peace instead of war or fears of war.
